Colloquium Trust in Contemporary Society: Socialization, Social Capital and Democracy

This international colloquium seeks to contribute to the on-going debate about the relationship of social capital and democracy. It is held on occasion of the publication of the monograph *Trust in Contemporary Society* (Brill, 2019). It will address the following questions: What are bases of trust? What is the relationship between norms of reciprocity and trust? Which socio-political mentalities reflect pro- and antidemocratic tendencies? How is social capital transmitted and what role does it play in social reproduction?

It is organized by Markéta Sedláčková and Jiří Šafr from the Institute of Sociology of the Czech Academy of Sciences.

The event is supported by the project CSDA Research – Research programme of the Czech Social Science Data Archive and presented under the auspices of the Strategy AV21 of the Czech Academy of Sciences – Role of communication.

The event is held in English. No registration is needed.
